ALi®

ALi joins Voxel Music for new line of connected audio products.

Montpellier, France & Taipei, Taiwan – September 09, 2016 – ALi Corporation, a leading innovator and developer of set-top box chipsets, and Voxel, the creator of a unique audio entertainment suite, today announced their collaboration to have Voxel Music pre-integrated on ALi's Connected Audio and Set Top Box SOCs. The partnership solution aims to benefit STB and audio manufacturers with accelerated time-to-market and cost advantages, to bring a consistent, comprehensive and advanced music ecosystem to audio and Pay-TV industries, by having innovative user experiences and differentiating value-added services.

Both companies are joining their efforts in order to build cost-effective audio solutions for the growing multi-room market and with special attention to its convergence with TV.

The first fruit of this close collaboration is a cost-effective multi-room audio system, a mass-market version of the Voxel 2015 CES Awarded Audio device, the Audio Capsule.

Several other devices or modules are derived from it and will appear later on the market.

“We believe in the convergence of audio and TV, and have developed advanced solutions with this aim. We’re glad to collaborate with ALi Corporation and to combine our skills and technologies, bringing the best multi-room ecosystem to manufacturers, brands and operators”, says Jean-Charles Verdier, CTO of Voxel.

ALi based Voxel product designs are leveraging the flexibility and security accessible from M3733, as well as HEVC M3627 product lines. ALi and Voxel are looking ahead at next generation products combined with the best of high resolution audio with 4K ALi Video chipset.

“In Voxel, we found a partner, who like us, believes in the value of merging Connected Audio devices with the big screen, thinking that audio is also moving through its performance and quality evolution just like video. ALi is proud to join Voxel Music on the

side, with prestigious audio firms like Elipson, Tangent, Didit and Inprodicon. We are jointly opening a new market segment by merging Audio and Video”, says Francois Galy Senior Vice President New Business Division of ALi corporation.

Voxtok Music combines Services & Content, Products and Technologies.

Services & Content: Streaming (MP3 to CD) and downloading (MP3 to Hi-Res) white-label platform, Music Intelligence, Discovery & recommendation, multi-source, Acoustic recognition.
